

CONFERENCE PROGRAM

2011 NAEM EHS MIS CONFERENCE

Solutions for the Next Generation
of Data Management Challenges

MARCH 2-3, 2011
SAN ANTONIO, TX

www.NAEM.org

2011 NAEM EHS MIS CONFERENCE

Welcome to San Antonio!

For EHS and sustainability professionals to thrive, you must be able to collect, analyze and report large amounts of information. Fortunately with new innovation and technology, this has never been more attainable.

The 2011 EHS MIS Conference was designed to help you discover new possibilities and approaches to data management. The sessions confront common challenges including effective implementation and maintenance of your current MIS system. Leading companies will demonstrate the solutions they use for Carbon Accounting, EHS Compliance, Sustainability Metrics and much more. The Vendor Café will allow you to meet a variety of software and service providers and learn about their solutions in a relaxed atmosphere.

Whether you are in the market for a new system, or seek best practices and new ideas, we encourage you to take an active role in this conference. Use this opportunity to ask questions, share experiences and meet your fellow EHS and sustainability peers. **NAEM is proud to welcome you to San Antonio and the 2011 EHS MIS Conference.**

THE PREMIER ASSOCIATION FOR EHS MANAGEMENT

Enabling the Sustainable Company Measure. Manage. Profit.

Enablon Software Solutions for Sustainability & EHS Management

As the world's largest sustainability & EHS software provider, Enablon helps companies create a path toward sustainable performance.

Over the last 10 years, Enablon has been providing global companies with solutions to measure and manage their environmental and social impacts while improving the bottom line.

Enablon's complete suite of software solutions enables companies to accurately measure their direct and supply chain footprints, enhance EHS performance, reduce environmental and energy costs and attain compliance with existing and new regulations.

Enablon is recognized by industry-analysts as a leader in the sustainability management space:

"Enablon continues to impress me with their complete product offering, strong customer base and holistic approach to enabling sustainable business".

Paul Baier, Groom Energy

To learn how Enablon can help your company meet its sustainability and EHS challenges and join the 250 global companies using Enablon, contact us today.

*Sustainability Inside

- ✓ Manage your emission reduction programs
- ✓ Streamline your EHS reporting and compliance processes
- ✓ Ensure your incident & risk prevention
- ✓ Reduce your operational costs
- ✓ Report to your stakeholders

SESSIONS

WEDNESDAY, MARCH 2

Keynote Address *(Grand Ballroom CD)*

9:15 - 10:15am

As the Director and Counsel of EHS Operations for GE, Mark Stoler will give a comprehensive look at global EHS management in a large, diversified company. While GE has grown and entered new ventures, information technology (IT) has become more important at each step. This case study will examine how GE developed an EHS IT system to manage EHS processes and data throughout the company, and how the system has grown and adapted.

Software Demonstrations – GROUP 1

10:30 - 11:15am and repeated from 11:30am - 12:15pm

NRG Energy presenting Intelix Technologies Inc. *(Grand Ballroom CD)*

Laura Scott, Manager Environmental Business, NRG Energy Inc.

The Intelix EHS Management System enables organizations to surpass compliance requirements, effectively manage risks, improve operational performance, and foster a culture of corporate social responsibility. While NRG uses Intelix for a wide variety of tasks, their demonstration will focus on the management of Greenhouse Gas at the corporate level for mandatory and voluntary reporting.

Biogen Idec presenting KMI EHS Suite *(Grand Ballroom A)*

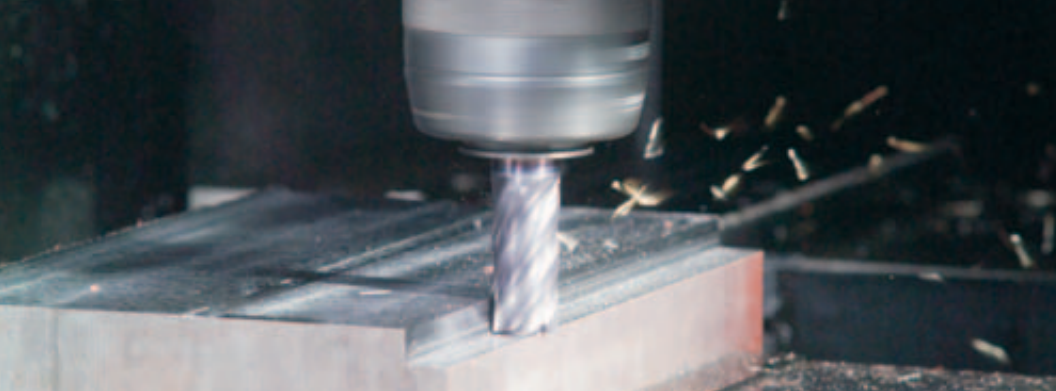

Patti Miceli, Senior Manager EHS & Sustainability, Biogen Idec

The KMI EHS Software Suite is an off-the-shelf, web-based application used for Sustainability Metrics, Compliance, Permit, Corporate Audit, Incident and Corrective Action Management. Biogen will give a demonstration of how they use the software and discuss the process of implementing sustainability software while the corporate sustainability program was still evolving.

Yale University presenting eShipGlobal *(Grand Ballroom B)*

Kevin Charbonneau, Manager, Safety Advisor Program and Assistant RSO, Yale University

eShipGlobal is used for the shipping and exporting of regulated materials, including biological, chemical and radioactive materials, in compliance with the Dept of Transportation, International Air Transport Association, Dept of Commerce regulations, etc. Yale's presentation will highlight how they have been able to use eShipGlobal to improve compliance while reducing the burden on the research community.

With over 70 facilities around the world, is Kennametal, Inc. overwhelmed by the number and complexity of their EHS requirements?

Not Anymore.

Don't miss their journey from complexity to compliance

Wednesday, March 2, 2011

SESSIONS

WEDNESDAY, MARCH 2

Software Demonstrations – GROUP 2

2:00 - 2:45pm and repeated from 3:00 - 3:45pm

Air Products and Chemicals, Inc. presenting SAP *(Grand Ballroom CD)***Tammy Grover, Lead Environmental Engineer, Air Products and Chemicals, Inc.**

Air Products is using SAP EHS Management to support key environmental compliance and emissions management processes at various locations to meet federal and local regulatory requirements and to improve compliance processes. SAP EHS Management is one of the foundational components of SAP's Sustainability Solutions. It provides comprehensive support for key EHS concerns such as environmental compliance, emissions management, safety and health, emissions management, product and chemical safety at the local, regional and global level.

Kennametal Inc. presenting iEHS *(Grand Ballroom A)***Heather Ruffner, Corporate Health & Safety Manager, Kennametal Inc.****Staci Miller, Corporate Environmental Manager, Kennametal Inc.**

iEHS is a web-based environmental health and safety information management system that offers functionality to capture, manage, organize and report on key EHS and sustainability data. Kennametal's demonstration will focus on the facility compliance elements of iEHS along with a review of Kennametal's facility score-carding approach, incident management and industrial hygiene programs.

The William L. Bonnell Co. and InterGen presenting Internally Built Systems Roundtable *(Grand Ballroom B)***Terry D. Snell, Division Manager Environmental, The William L Bonnell Co., Inc. Mark Chrisos, Director, Health, Safety, Security and Environment, InterGen****Leah Blinn, Manager of Environmental Compliance Services, NGE**

Even as EHS and sustainability software becomes more sophisticated and common in the work place, many organizations rely on internally-built systems for data management and reporting. This session, targeting users of 'home grown' applications, will feature two system demonstrations, based on Microsoft Excel and SQL, and show how the system practitioners have built and maintained strong compliance and incident tracking programs. There will also be an expert-led roundtable discussion for you to learn best practices for leveraging the power of internally developed tools and benchmark your own efforts.

Moderator: Joseph Tell, Partner, Solution Foundry

**innovation
that makes
a difference**

Why focus on usability?

- Decrease global rollout time by 50%
- Decrease up front and on going training costs by 75%
- Decrease internal system support time
- Get meaningful data from global operations
- Have your system celebrated instead of tolerated
- Drive true organizational change

"There were several systems that could meet our basic requirements. There was only one that was actually intuitive. Global adoption of the system has exceeded our most optimistic expectations."

Ted Leamen, Global Director of EHS and Sustainability, P&H Mining Equipment

See the difference!

www.kminnovations.com

(416) 410 4817

SESSIONS

WEDNESDAY, MARCH 2

Special Interest Sessions: Solving MIS Management Challenges

4:15 - 5:15pm

What's right for you? Choosing between Enterprise Resource Planning systems and EHS Specific Software *(Grand Ballroom CD)*

Glenn Mayer, P.E., Principal, E2ManageTech

This session will compare the strengths and weaknesses of using an Enterprise planning (ERP) based management information system as compared to an EHS specific software. Attendees considering whether to use the functionality embedded in their ERP applications will take away key information to help shape their decisions on whether or not they should consider other options. Topics that will be compared include best practices, costs, support, interfaces, and many more.

Enterprise EHS MIS: Life Beyond Initial Implementation *(Grand Ballroom A)*

David Orvis, Client Program Manager, Shaw Environmental & Infrastructure Group

When implementing an enterprise-scale MIS, the enormity of the initial implementation phase can sometimes obscure what lies ahead. Development of processes to ensure appropriate maintenance of the system after implementation is critical, but too often does not receive enough attention up front. This presentation will discuss some of the specific challenges of ongoing system maintenance, such as processes for data capture, stakeholder buy-in, user acceptance, and development of internal system expertise.

How to Ensure Your Next EHS & Sustainability System Implementation Will Support Your Business Goals *(Grand Ballroom B)*

Mark Pratorius, Client Services Manager, IHS

Technology experts estimate that nearly half of enterprise software implementations fail to achieve the desired objective of streamlining and simplifying EHS compliance and sustainability management. Constructing a detailed implementation plan and corresponding business case is critical to the success of any enterprise software solution implementation. This presentation will provide industry best practices for effective software implementation planning and show why organizations should do it before sending an RFP.

ProcessMAP

Software Empowering Decisions.
For People & Environment.

World's Largest Software-as-a-Service Platform for EH&S, Sustainability & Carbon Management

Over the last 10 years, customers across a wide range of industries have relied on ProcessMAP as their global enterprise platform, including many NAEM members such as: Allergan, Bunge, Cardinal Health, Caterpillar, Goodyear, Ingersoll Rand, ITT, John Deere, Ryder, Shaw (Berkshire Hathaway), SKF and Watson.

EH&S Management

- ✓ Accident/ Incident Management
- ✓ Job Hazard/ Risk Assessment
- ✓ Chemicals & MSDS Management
- ✓ Industrial Hygiene
- ✓ Permits Management
- ✓ Behavior Based Safety (BBS)

Sustainability and Carbon Management

- ✓ Sustainability Performance Management
- ✓ Energy & Carbon Management

Compliance Management

- ✓ Audits & Assessments
- ✓ Activity & Task Management

Please come by our booth in the Vendor Café for a live demonstration!

SESSIONS

THURSDAY, MARCH 3

Software Demonstrations – GROUP 3

8:30 - 9:15am and repeated from 9:30 - 10:15am

Cardinal Health *presenting ProcessMAP (Grand Ballroom CD)*

Jim Cline, Director, Environmental Affairs, Cardinal Health Inc.

PULSE is an enterprise EH&S, Sustainability, and carbon management platform that is used by Cardinal Health worldwide. Among other applications, Cardinal Health will demonstrate the software's Sustainability and Energy & Carbon Management modules.

Valero Corp. *presenting IHS Impact ERM Suite (Grand Ballroom A)*

Ellen Williams, Director of Process Safety Management Systems, Valero Corp.

IHS IMPACT ERM Suite is used improve loss rate performance in Safety, Environmental, Security, Transportation, Quality, and other areas where operational risks persist. Valero will demonstrate the Management of Change Assessment module which has been used to manage the risk from changes in operating procedures and other factors in the work place.

Goodrich Corp. *presenting Risk Priority Management (Grand Ballroom B)*

Tracy A. Beaudry, CSP, Health and Safety Manager, Goodrich Corp.

Risk Priority Management (RPM) is a web-based system for managing all aspects of an ergonomics improvement process. Goodrich will cover how RPM was integrated into their ergonomic process and demonstrate the tools used to identify and control ergonomic risk factors.

UPCOMING NAEM EVENTS:

Measuring Corporate Sustainability: Understanding the Metrics That Matter

May 4, 2011

Fort Lauderdale, FL

This event is a unique opportunity for you to discuss current sustainability rankings and ratings landscape with leading members of the environment, social and governance (ESG) research and investor community. Join this dialogue to better understand how external firms are evaluating your company's sustainability performance, share feedback on which metrics matter to you and benchmark best practices with your peers.

Enterprise Compliance Excellence & Best Practices

July 27-28, 2011

Minneapolis, MN

This workshop will feature a variety of case study presentations on compliance management best practices. Learn how your peers have ensured global environmental, health and safety (EHS) compliance through enterprise-wide EHS management systems, auditing and corrective actions. You will also learn about the latest resources for tracking national and global regulations, including emerging regulations related to product materials content.

19th Annual EHS Management Forum

October 19-20, 2011

Tucson, AZ

With more than 500 attendees, this conference is the largest annual gathering of environmental, health and safety (EHS) and sustainability decision makers. Join your peers for two days and 24 sessions of best practice sharing and benchmarking. Whether your company's priority is compliance assurance or building a formal sustainability program, the EHS Management Forum will offer you practical insights from those who've built and implemented these efforts at their companies. In addition to the learning sessions, the conference features an exhibit hall of targeted EHS and sustainability vendors and plenty of time for networking.

REGISTER TODAY! Visit www.NAEM.org

SESSIONS

THURSDAY, MARCH 3

Software Demonstrations – GROUP 4

10:30 - 11:15am and repeated from 11:30am - 12:15pm

General Electric Co. presenting Gensuite LLC *(Grand Ballroom CD)***Gretchen Retteghieri, Global Compliance Assurance Leader, GE Oil & Gas**

Gensuite is a comprehensive suite of EH&S modules, covering the entire spectrum of compliance and management processes. This demonstration will cover the key sustainability and compliance applications, including emissions tracking, that help drive GE's EHS initiatives and will describe how they help digitize the compliance and sustainability improvement processes.

J.B. Poindexter & Co. presenting ERA EHS *(Grand Ballroom A)***Phil Schull, Vice President of Risk Management, J.B. Poindexter & Co. Inc.**

ERA EHS is an environmental compliance management system which includes compliance task tracking, auditing, environmental data management, and environmental reporting. J.B. Poindexter will show how it uses ERA EHS to do all of its compliance task management and environmental reporting for 35 facilities across the world.

AMCOL International Corp. presenting MSDgen *(Grand Ballroom B)***Kelvin Roth, Director, Environment, Health & Safety Group, AMCOL International Corp.**

MSDgen is an (M)SDS authoring software system for global chemical regulatory compliance, including GHS & REACH requirements, (M)SDS distribution & Label generation. Learn how AMCOL uses it in over in 15 countries and languages in accordance with each country and competent authority's adaptation of GHS.

2011 EHS MIS Survey Results and Discussion *(Grand Ballroom CD)*

1:45-2:45pm

Jake White, IT Project Director, AECOM Environment
Margery Moore, Director of EHS Strategic Alliances, BNA

In its tenth year, the NAEM EHS MIS Survey will deliver insights into how your peers are managing ever-increasing amounts of EHS and sustainability data. Gain a better understanding of the current MIS landscape and learn what the most important trends are in technology, implementation and spending.

VENDOR CAFÉ

The Vendor Café, located in the *LaJoya Ballroom*, is an opportunity for attendees to meet with software vendors and service providers in a relaxed atmosphere. Please take this chance to compare products and view demonstrations from a variety of different vendors. The Vendor Café will be open during breakfast, lunch hours and the evening networking reception. See the agenda (page 4) for specific times.

Enablon

Enablon is the world's leading QEH&S & Sustainability Management software provider with solutions used by more than 200,000 users in 250 global companies and by thousands of SMEs worldwide.

Enablon offers the industry's most comprehensive Sustainability Management Platform with solutions for:

- ▶ Corporate Responsibility & Responsible Supply Chain
- ▶ Quality, Environment, Health & Safety Performance
- ▶ Air, Water, Waste and Chemicals Management
- ▶ Regulatory Compliance & Audit Management
- ▶ Carbon & Energy Management
- ▶ Incident & Risk Prevention
- ▶ Product Stewardship

For detailed information, case studies, quotes and product demonstrations: www.enablon.com

KMI

KMI is a full-service EMIS solution provider focusing on compliance, sustainability and safety. We know that implementing a successful EMIS is an extremely challenging task for EHS managers and it is our mission to deliver success without stress - every time.

Our enterprise-level software delivers unique usability, flexibility, and a true

balance between facility and corporate tools for risk reduction, workflow management, greenhouse gas reporting, environmental metrics and key performance indicator analysis. Our most popular modules include:

- ▶ Sustainability & Metrics
- ▶ Compliance Management
- ▶ Incident Management
- ▶ Audit & Inspection
- ▶ Corrective Action

Data visualization has been designed around significant research into the most effective ways to convey details, patterns, and the big picture through structured but flexible reports and dashboards. We focused on substance not flash. EHS managers, facility managers and executives all get the information they need to quickly and accurately understand what is going right, what is going wrong, and what is likely to go wrong in the future.

Come see how KMI has been leveraged by a leading biotech company in the Group 1 Session Wednesday morning presented by Patti Miceli - Senior Manager EHS & Sustainability at Biogen Idec.

ProcessMAP

ProcessMAP is the global leader in Environmental, Health, Safety and Sustainability software solutions. Customers rely on our SaaS platform to streamline accident & incident management, sustainability reporting, carbon management, audits and assessments, and compliance and action item management.

Our platform coupled with comprehensive services from blueprinting to rollout to 24x7 helpdesk makes us the partner of choice for rapid global deployments for customers in more than 70 countries.

iEHS®

iEHS® (www.iEHS.com) is the “Intelligent Information Management Solution for the Sustainable Enterprise.” iEHS® and its Apps provide real-world, simple solutions that manage the technical aspects of EHS and sustainability. Apps include Sustainability Metrics, Audits, Health & Safety Metrics, Incident Management, and many more. These Apps are “powered by iEHS” and were created in concert with our clients to solve their most pressing issues. The iEHS Reporting App is the most powerful in the industry through its utilization of a Business Intelligence engine. This App allows clients to analyze their metrics a thousand different ways, but most important, exactly in the way that they need.

Designed and implemented by EHS professionals, iEHS® was developed by listening to our 100+ clients and many of the 5,000+ users at 1,500+ facilities in 40 countries. As a result, iEHS® utilizes built-in best practices and provides clients with exceptional:

- ▶ Usability
- ▶ Configurability & Compatibility
- ▶ Flexibility
- ▶ Global Applicability

As a fit-for-purpose, web-hosted software solution, iEHS® is configured, implemented and supported by EHS and sustainability professionals from Antea Group, Oranjewoud, and associates of the Inogen Environmental Alliance.

Intelix Technologies Inc.

Intelix Technologies Inc. has been a global leader in Environment, Health and Safety (EHS) management and business performance software solutions since 1992. Our scalable, web-based platform and suite of EHS applications provide clients with unprecedented flexibility and enable users to build a product package that meets their unique needs. Our staff has a proven reputation for friendly, knowledgeable service and is committed to helping more than 500 clients and 240,000 system users get the most out of our groundbreaking, user-friendly software solutions, every step of the way. Intelix clients include luminaries such as Heinz, Campbell’s, Virgin Atlantic, Subaru, Nestle, Energizer, Church & Dwight, and many more. Go to www.intelix.com for more information about Intelix and its clients.

VENDOR CAFÉ

ERA Environmental Consulting, Inc.

ERA Environmental Consulting, Inc. provides off-the-shelf, customizable, web-based solutions for environmental compliance, health and safety. ERA'S EHS Software provides regulatory tracking and reporting capabilities for SARA 311, SARA 312, SARA 313 and NPRI. ERA's Environmental, Health & Safety software solutions meet the needs of single facilities and multinational corporations operating in complex regulatory environments. Our enterprise software provides a broad range of tools for typical EHS compliance tasks such as Environmental Management, Training Management and Incident Tracking w/ OSHA 300 Log generation, Compliance Auditing, Laboratory Inspections, Compliance Calendar Tracking w/E Mail Alerts, MSDS Management and Hygiene Sampling. Our diverse client family includes well-respected companies such as Toyota, TENARIS, SAPA, J.B. Poindexter & Co., Masco and Medtronic Diabetes.

E2 ManageTech, Inc. (E2)

An industry leader in Environmental Health & Safety Management Information Systems design and implementation, E2 ManageTech, Inc. offers clients superior IT solutions for operational performance, compliance obligation management, and sustainability consulting. E2 is software neutral. Our proven software analysis process provides an objective review based on client-specific criteria. Strategic Planning, Detailed Design, Architecture Definition, Implementation. Information on our full spectrum of engineering-based solutions can be found on our website: www.E2ManageTech.com.

IHS, Inc.

IHS, Inc. is a leading source of information and insight in vital areas that shape today's business landscapes: energy,

economics, geopolitical risk and supply chain management. IHS is also the leading provider of information management solutions that support environmental, health, safety compliance and sustainability (EHS&S) in six areas, including Greenhouse Gas and Energy Management, Environmental Compliance, Health and Safety, Product Stewardship, Operational Risk Management and Corporate Responsibility. IHS stands apart by delivering the market's most comprehensive solutions that include software, information content, and expertise - essential tools that help organizations to effectively drive critical processes and make high-impact decisions.

BNA

BNA presents an integrated, intelligent, closed-loop solution for your EHS compliance obligations. BNA's ComplianceAssure™ - Global - Customizable - Interoperable! BNA's new EHS compliance management data center streamlines regulatory monitoring, auditing, verification, and analysis. For decades, BNA has given you a world of EHS information. Now, BNA's ComplianceAssure™ lets you manage that information and maximize your business results. Save time, save money, and rest assured that you are always in compliance!

Conestoga-Rovers & Associates

Conestoga-Rovers & Associates (CRA) provides engineering, environmental consulting, construction, and IT services. CRA employs 3,000 people in 90 offices providing environmental site assessment and remediation, environmental health and safety, solid and hazardous waste management, sustainability and data management services as core competencies. Our IT group, in particular, is an industry leader in providing data management services and supports over 1,000 different clients. We develop innovative solutions to help our clients

get the most out of their data. For more information on CRA, please visit our website at www.CRAWorld.com.

Gensuite®

Gensuite® is a unique combination of innovative technology and services that provides our business subscribers with leading-edge, proven Web applications and implementation strategies to drive EHS compliance and performance excellence. Each application in the Gensuite system has been developed to meet the needs of everyday process owners. Gensuite can be activated with priority applications that are ready to use quickly and with minimal capital investment; and then scaled-up cost-effectively.

Gensuite today consists of 60+ applications used by nearly 100K+ users world-wide, with turnkey support from the EHS-savvy team at Gensuite LLC. If you are looking for best-in-class, scalable, hosted-access digital EHS compliance, we invite you to look at joining our Gensuite Partners Community, a peer group of performance driven companies that have deployed the Gensuite system of digital solutions!

RegScan GCS 2.0

RegScan is an innovative and award-winning leader in regulatory research and compliance products. Our range of products include: Audit Protocols, Change Management & Alert Services, and Regulatory Research tools. We've recently introduced the CheckPoint® Audit System, which integrates the renowned Checkpoint® energy audit protocols, written by and for the energy community, with an easy to use internet-based compliance system. Our global reach means we have coverage for Domestic, North American, and International regulations and audit protocols. Our tools allow users to build custom audit libraries, create tailored alerts, and monitor whole

jurisdictions or individual documents for change. Tools for compliance professionals.

Dakota Software Corporation

Dakota Software Corporation has been providing EHS management software to regulated industries, consultants and government since 1988. Dakota's primary differentiator is the integration of regulatory content with the software tools. Dakota's ProActivity Suite of software ensures that enterprises are identifying all applicable requirements, communicating substantive regulatory changes that directly affect site operations and providing executive dashboard visibility into EHS compliance and carbon management activities across the enterprise. Dakota's Suite of products, Profiler, Auditor, Tracer, Scout and Metrics can be used in combination or independently to proactively manage compliance at the point of control. For more information about Dakota Software, visit www.DakotaSoft.com or call 216-765-7100 ext. 2.

3E

3E Company, a member of the Verisk Analytics Family of companies, provides a comprehensive suite of data products and information services that enable improved compliance with global EH&S requirements related to the safe manufacturing, distributing, transportation, usage and disposal of chemicals and products. 3E's set of solutions includes EH&S regulatory data and tools; MSDS authoring, distribution and management; transportation; emergency response; regulatory reporting and hazardous waste management. Wherever you are in the supply chain or product lifecycle, 3E can deliver a program specific to the EH&S compliance information and management needs of your organization that provides benefits to the entire enterprise and beyond.
