

Creating a sustainable  
future using **generative**  
**AI**

→ Transform for good

A photograph of two women wearing hard hats and safety vests, standing on a construction site at dusk. They are looking towards a large wind farm in the distance. The scene is dimly lit, with the sky showing a gradient of colors from blue to orange. The text "Sustainable future" is overlaid in white, bold, sans-serif font across the center of the image.

**Sustainable future**

**Sustainability is the ability to exist and develop without depleting natural resources for the future.**

A sustainable business model creates and maintains long-term value, balancing ecological, social and economic impacts.

A large solar farm with rows of solar panels in a field, with mountains in the background. The panels are tilted and arranged in a grid pattern. The background shows rolling hills and mountains under a clear sky. The overall scene is a landscape of renewable energy.

**Leading the way towards a  
brighter future.**

**In the face of runaway climate change, water scarcity, deepening inequalities and interconnected challenges, the global call for a spark of hope is unmistakable.**

# Meet the panel
